

DIGITAL LIGHTING EXPERIENCE

Did you know that up to 40% of a facility's electric bill is the cost to operate its lighting? Did you also know that this cost can be reduced by up to 60%?

Digital Lighting and Controls is the fastest growing segment of the commercial lighting business. For good reason, advanced LED lighting fixtures coupled with state of the art control capability is drastically reducing the cost of operations for facility owners throughout America.

To learn more about the exciting advancements in digital lighting technology Pacific Lighting Systems cordially invites you to the Acuity Brands Digital Lighting Experience seminar. This timely and highly informative program will give you the opportunity to:

- See digital lighting systems in action
- Learn about the current and future LED technology trends
- Understand how digital lighting systems can reduce operational costs
- Earn AIA CEU's
